## Utility of CTSC

TotalMasternodes.com will be the **No.1** masternode information website and to list a project or advertise on the platform, payment will be required in CTSC.

Utility of TotalMasternodes.com

- List of masternode coins available and on ICO
- Advanced filters, save filters and custom layouts
- Community ranking system for coins
- Masternode monitoring service
- Personal portfolio tracker.
- Purchase history for tax compliance.
- Chatbox - to chat with other investors
- Custom listing
- Masternode setup guides
- Shared masternode hosting service
- Full masternode hosting service
- All coin wallets in one easy to find location
- Mobile app including your personal portfolio

## Introducing to CTSC and Totalmasternodes.com platform.

How things got started.....

CTSC is created after a community takeover of CTS coin. The CTS developers like so many other coins, had one plan in mind and that was to scam their investors. Early investors will remember the rockets emoji announcements telling us all was fine but sadly this wasn't to be. A number of us joined together and created a new discord channel to save the community and the coin. We formed a new plan and so was born CTSC.

Work on CTSC started July 2018 with the vision of creating a platform [TotalMasternodes.com](https://TotalMasternodes.com) where investors can find the most up-to-date information on masternode coins and projects. With this platform investors will be able to find all masternode information in one location.

CTSC is the currency used on the platform for coin listing and advertising.

## How will you benefit from our platform?

- No knowledge required setting up new Masternodes
- With our advanced monitoring system, you will always be up to date with your Masternode status
- You will not need to invest the full Masternode collateral by taking part in our Shared Masternodes platform
- With your own personal portfolio, you will be able to see exactly what you are earning and how your coins are performing
- You will save on PC and electricity costs by staking your coins on our platform
- You will have all the information at your fingertips required to make an informed decision on purchasing new Masternodes / PoS coins
- With our proprietary voting system, you will see other users' opinions of coins and their performance.
- You will have a single site to both view your portfolio as well as monitoring your MN and PoS investments.
- With our upcoming ICO listing you can get a head start in preparing for your investment

So just sit back and watch your portfolio grow as we do all the nitty-gritty stuff for you.
